**DETAILED ACTION**

***Response to Amendment***

1. In response to the amendment received May 5, 2008:
  - a. Claims 29, 31-33, 71-88, 90-104, and 106-127 are pending.
  - b. The previous claim objection has been withdrawn in light of the amendment.
  - c. The previous prior art rejection of record has been withdrawn in light of the amendment.
  - d. The previous provision double patenting rejections (with respect to US Applications 10/484474, 10/665687, 10/666790, and 10/666861), as they are the only rejections of record. It is noted that the double patenting rejection with respect to US 6670071 has been withdrawn, as the instant application is a division of the aforementioned patent, wherein the claims of the instant application were restricted from that of the parent. Thus double patenting in this case is not proper.

***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 5, 2008 has been entered.

***Information Disclosure Statement***

3. The information disclosure statement filed May 5, 2008 has been placed in the application file and the information referred to therein has been considered as to the merits.

***Allowable Subject Matter***

4. Claims 29, 31-33, 71-88, 90-104, and 106-127 allowed.

The following is an Examiner's statement of reasons for allowance: none of the prior art of record, alone or in combination, appear to teach, suggest, or render obvious the invention of at least claims 29, 84, 100, 115, and 122.

Claim 29 teach the electrode assembly comprising the elements therein. Notably, it teaches that the electrode strip in electrical communication with the pin extends through the mandrel slot.

McHenry does not teach the invention of claim 29. As seen in the figure, the mandrel with mandrel slot (metal tube [12] and plastic tube [13]) encompasses the pin (wire [14]). It is clearly seen that the positive electrode strip [17] in contact with the pin (wire [14]) is connected via tab [18] and does not extend through the slot of the mandrel (defined with metal tube [12] and plastic tube [13]). There is no motivation to place the electrode strip into the mandrel slot of McHenry. Doing so would also not allow the electrode strip to be wound in the manner as taught by McHenry, thus destroying the reference as depicted in the figure. Since claims 31-33 and 71-83 are dependent on claim 29, they are allowable for the same reason.

The reasons for allowability for claims 84, 100, 115, and 122 have been set forth in office action dated February 5, 2008, incorporated herein. Since claims 85-88, 90-99, 101-104, 106-114, 116-121, and 123-127 are dependent on one of the independent claims above, they are allowable for the same reasons.

***Examiner's Amendment***

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

a. Amend the paragraph beginning at page 2, line 7 of the specification as follows (wherein the change is indicated by the underlined portion):

"This application is a Divisional of U.S. Patent Application No. 10/167,688, filed June 12, 2002, issued as U.S. Patent 6,670,071 on December 30, 2003, which claims the benefit of U.S. Provisional Application No. 60/348,655, filed January 15, 2002, each of which is incorporated herein by reference in its entirety."

**Note:** Although the attorney of record was not contacted for the amendment listed above, such an amendment is proper, as it only serves to update the status of the parent case listed within the continuation data within the Specification.

***Conclusion***
